Wet Tantalum Capacitors, Space Level, Established Reliability, DLA Land and Maritime Drawings 06013, 06014, 06015, 06016

FEATURES

- · Screened for space level applications
- Tantalum case, hermetically sealed, axial leaded
- Screened M39006/22/25/30/31 capacitors
 - "R" or 0.01 %/1000 h failure rate
 - "H" or high shock and vibration rated
 - Enhanced 100 % or group A testing
 - Enhanced production lot testing group b prior to shipment
 - Stability
 - Thermal shock
 - 1000 h life at +85 °C

Established Reliability "Space Level" Wet Tantalum Capacitors

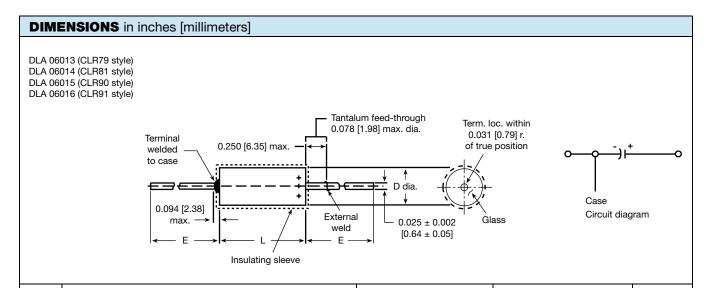

In accordance with the DLA land and maritime drawings, all parts are up-screened from "R" failure rate, "H" characteristic, MIL-PRF-39006/22/25/30/31 capacitors. Parts are marked with the appropriate DLA land and maritime drawing number and PIN (dash number). For information on the exact performance of these capacitors, please refer to the latest issue of the DLA land and maritime drawing and appropriate military specification.

Notes

ESR (max.) =
$$\frac{DF}{2\pi fC}$$
 , where

DF = maximum dissipation factor from Standard Ratings table

f = 120 Hz

⁽¹⁾ Dash number will include the letter "H" to indicate the vibration and shock requirements (i.e., 51 g random vibration, 80 g sinusoidal vibration and 500 g shock)

⁽²⁾ Maximum ESR is calculated by the following equation:

⁽³⁾ For ripple current limits at various temperatures, voltages, and frequencies, see Ripple Current table

www.vishay.com

Notes

ESR (max.) =
$$\frac{DF}{2\pi fC}$$
, where

DF = maximum dissipation factor from Standard Ratings table

f = 120 Hz

C = nominal capacitance

(3) For ripple current limits at various temperatures, voltages, and frequencies, see Ripple Current table

⁽¹⁾ Dash number will include the letter "H" to indicate the vibration and shock requirements (i.e., 51 g random vibration, 80 g sinusoidal vibration and 500 g shock)

⁽²⁾ Maximum ESR is calculated by the following equation:

- 1. At +125 °C the rated voltage of the capacitors decreases to 66 2/3 % of the +85 °C rated voltage
- 2. The peak of the applied AC ripple voltage plus the applied DC voltage must not exceed the DC voltage rating of the capacitor either forward or reverse
- 3. The ripple current listed represents a rating calculated using a maximum internal temperature rise (ΔT) of +50 °C at 40 kHz at +85 °C ambient with a maximum peak rated voltage of 66 2/3 % of the +85 °C peak voltage rating
- 4. The maximum allowable internal temperature rise (ΔT) decreases linearly to a calculated +10 °C rise at +125 °C ambient
- 5. The internal temperature rise is directly proportional to the equivalent series resistance of the capacitor and equivalent series resistance increases with decreasing frequency

⁽¹⁾ Dash number will include the letter "H" to indicate the vibration and shock requirements (i.e., 51 g random vibration, 80 g sinusoidal vibration and 500 g shock)

Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Hyperlinks included in this datasheet may direct users to third-party websites. These links are provided as a convenience and for informational purposes only. Inclusion of these hyperlinks does not constitute an endorsement or an approval by Vishay of any of the products, services or opinions of the corporation, organization or individual associated with the third-party website. Vishay disclaims any and all liability and bears no responsibility for the accuracy, legality or content of the third-party website or for that of subsequent links.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
